

What statistical software should I use (and how much does it really matter)?

26th July | 11am–12pm | Room 033, Adams Building, 18 Frederick Street
Presented by: Andrew Gray, Senior Research Fellow, Biostatistics Centre

Feeling like there are too many statistics programs and/or not sure which one (or ones) would be best for you? Come along to this seminar to learn about the software biostatisticians work with, find out why we use certain programs and for what, and discover sources of information so you can learn more about the software best for you and your research.

Any questions please email: biostatistics_dunedin@otago.ac.nz
